@curlathuron

The Centre for Undergraduate Research Learning (CURL) aims to transform undergraduate learning through research. We are a network of faculty, staff, students, and community partners working to support undergraduate research learning experiences at Huron University College.

CURL was established to promote a culture of personalized student mentorship and research collaborations by developing academic skills and financially supporting student driven research initiatives. Connecting with local and global partners, CURL strengthens a learning community committed to enhancing undergraduate research opportunities both inside and beyond the classroom.

CURL is a destination to harbour and financially support students' goals through mentorship and research.

To learn more about CURL, please visit
www.huronresearch.ca/curl/!
